PROPERTIES :

- Gives fuller leather with fine and smooth grain and the color will be very clear.
- Used mainly in the production of white and light fast leather.
- Has got very good self-tanning power hence, it can be highly recommended in the production of chrome free or wet white tanning.
- Enhances excellent light fastness to the leather with more uniform dyeing of pastel color.
- Is inert to salts and can be used in all the stages in all types of leather.
- In combination of vegetable extracts improves penetration of tanning with a clear color and elastic grain and it dissolves easily and thus no sludge formation is found.
- Has a good dispersing effect on the tanning bath.
- Increases the buffing property.
