

Anionic amino resin tanning agent based on DCDA

Aspect	: Beige Colour free flowing powder
Basis	: Amino resin blended with anionic dispersant & inert fillers
Active content	: 95 % min.
pH	: In 10% aqueous solution, 8.0-9.0
Solubility	: Soluble in water with slight sediments
Stability	: Stable to Neutral salts, Acids and Bases in usual concentrations in tannery. Compatible with Synthetic and Vegetable tanning agents and Dyes

PROPERTIES :

- It has a selective filling action, which is mainly deposited in the loose structured parts of the leather.
- Due to less astringency it do not disturb the grain, hence the resultant leather will be flat with fine grain.
- Improves the fullness of chrome leathers & tightens the grain
- It tighten the grain and improves the feel of the leather
- Imparts good surface for buffing and embossing
- imparts good level dyeing properties

APPLICATIONS :

1. SWAEKASYN R7 can be used up to 5.0 % for all types of leather to get tight grain and to improve the fullness of loosely structured parts of the leather.
2. SWAEKASYN R7 is suitable for retanning of all types of chrome leather. It can be used alone or in combination with synthetic, vegetable & chrome tanning materials.
