

Lightfast synthetic fatliquor

Aspect	: Brown coloured clear liquid
Basis	: Based on saturated hydrocarbons
Active content	: 60±1.0%
Charge	: Anionic
pH of 10% solution	: 7.0±0.5
Solubility	: Soluble in water in any proportion, with clear solution
Stability	: Good in anionic conditions

PROPERTIES :

- Due to the formation of micro emulsion in aqueous solution, it penetrates deeply and uniformly throughout the entire cross-section of leather giving uniform internal softness.
- It's excellent light fastness makes it suitable for white, pastel coloured and aniline leather.
- It is compatible with other oils such as fish oil, vegetable oils etc. and owing to its high emulsifying power, it helps in emulsification of other oils when used in combination.

APPLICATIONS :

After neutralization, (% based on Shaved Weight)

Softy side leather	: 3-6% SWAEKAOIL SAN on shaved weight
Cow Nappa	: 5% SWAEKAOIL SAN on shaved weight
White goat/sheep skin	: 6-8% SWAEKAOIL SAN on shaved weight
Buff Upholstery	: 8-10% SWAEKAOIL SAN on shaved weight

Note: Color of the product may vary due to its characteristic. The product is in the form of an emulsion but may occur small variation in color and viscosity. However, this will not affect overall property of the leather. Need to stir / mix well before using.
