

SWAEKASYN CS

Chrome Syntan

Aspect	: Light green powder
Basis	: Chrome complexed with phenol sulphonic acid
pH	: In 10% aqueous solution, 3.5-4.5
Solubility	: Excellent
Cr2O3	: 11 -13

PROPERTIES :

- Can be added in the powder form & with low float.
- solution is less sensitive to any sudden rise of the pH.
- It ensures level dyeing without lightening them noticeably.
- It fixed to the leather & reacts with the collagen without producing any astringency & level dyeing.
- It gives soft leather with fine, smooth grain and good fullness without alteration of the typical chrome character

APPLICATIONS :

Rechroming of wet-blue (% based on shaved weight):

1. In Rechroming of Upper, Garment: SWAEKASYN CS - 4.0 – 6.0%
2. In Rechroming of Upholstery leather: SWAEKASYN CS - 3.0 – 4.0%
