

## SWAEKASYN FB-6

---

Special Resin-tanning agent based on melamine

<b>Aspect</b>	: Light Beige Colour Powder
<b>Basis</b>	: Blend of sulphonated amino resin
<b>Active content</b>	: 95 % min.
<b>pH</b>	: In 10% aqueous solution, 8.5 – 9.5
<b>Solubility</b>	: Soluble in water with slight sediments
<b>Light fastness</b>	: Excellent

### **PROPERTIES :**

- Is a soft resin in powder form recommended to obtain mellowness and even round filling during retanning process of chrome-tanned leather.
- Gives good penetration effect and gives an excellent fullness especially in the loose part of the skin.
- Has got very good buffability and does not bleach the colour. So, it is very much suitable for the production of Suede and Nubuck leather.
- Gives uniform filling with body to the leathers, also produces soft, tight grained, rubbery leather.

### **APPLICATION:**

SWAEKASYN FB 6 can be used in all stages for the production of any articles (e.g., uppers, garment, lining etc)
