

## SWAEKASOL DP

---

### Soaking & Emulsifying Agent

<b>Aspect</b>	:	Clear Transparent viscous Liquid
<b>Basis</b>	:	Fatty Alcohol Emulsifier
<b>pH (1:10)</b>	:	6.5 – 7.5
<b>Solids</b>	:	20 ± 2 %
<b>Solubility</b>	:	Soluble in warm water
<b>Light fastness</b>	:	very good
<b>Stability</b>	:	Stable at all pH

### SWAEKASOL DP

- Is strong wetting cum emulsifying agent that helps to open not only fibers but also helps to emulsify natural fats & oils.
- When used in liming before starting the dosage of Lime & Sodium Sulphide, it helps in reducing the astringency and so helps for better dissolution and penetration of lime & Sulphide so reduce the chance of wrinkles into the leather.
- When used in deliming along with deliming agents, it helps in better cleaning of hides and reduce chance of residual lime into the pelt.
- When used in bating, it reduces astringency of bating enzymes and so helps in protecting grain from the attack of bating agents, so reduce chance of grain off.
- When used in pickling just after adjusting Bohme, it helps in better exhaustion of Chrome Powder.

### APPLICATIONS

Soaking	:	0.5 – 1.0% on Raw weight
Liming	:	1.0 – 1.5% on Raw weight
Deliming	:	0.5 – 0.8% on Pelt weight
Bating	:	0.3 – 0.5% on Pelt weight
Pickling	:	0.5 – 0.8% on Pelt weight
