

## SWAEKASYN T-FIX

---

Inorganic Salt Free, No Formaldehyde Polymeric Fixing Agent

Appearance	:	Light reddish color Powder
Nature	:	Polymeric Neutralized Acrylic Powder Syntan
Concentration	:	98 ± 2%
Ionic Nature	:	Weakly Anionic
pH	:	In 10% aqueous solution, 4.0 – 6.0
Solubility	:	soluble in water
Light Fastness	:	Excellent

### SWAEKASYN T-FIX

- is completely re-dispersible in water
- Is strong fixing agent for Dye, Syntan & Fatliquor
- Is weakly anionic, so helps to fix the strongly anionic Syntans and fatliquor, when it is used at the end of the process.
- Imparts excellent grain tightness.
- When used in chrome / vegetable / wet white tanning after penetration of tanning agent and before basification, it helps in exhaustion of tanning agent.
- Is recommended in rechroming at the end of rechroming and before basification.
- Improves the brilliancy of Dye.

### Application

Chrome / Vegetable / Wet White Tanning	:	0.5 – 1.0% on Pelt weight.
Rechroming	:	1.0 – 1.5% on Shaved weight.
Post Fatliquoring	:	1.0 – 2.0% on Shaved weight

### Caution:

Need to avoid usage of fatliquor in the same bath, wherever T-Max has been already used and is present even after the running of the product.
